## RESUMEN

EL proyecto describe los espacios sociales en el que se desarrolla el emprendimiento informal de los inmigrantes venezolanos, el diseño de investigación fue no experimental transversal, con un alcance descriptivo. Los migrantes desarrollan sus actividades de manera nómada en las vías públicas sin ningún control. Se concluye que los espacios que utilizan los emprendedores requieren de soluciones significativas por parte de las instituciones públicas.

Palabras clave: Emprendimiento, Espacios sociales, inmigrantes, informalidad laboral

### **Antecedentes:**

El DANE (2019) y el Observatorio de Migración Venezuela (2020) estudian el crecimiento de la población venezolana en ciudades del país y los sectores en que trabajan.

### **Objetivos:**

Describir los espacios sociales en el que se desarrolla el emprendimiento informal de los inmigrantes venezolanos.

### **Materiales y Métodos:**

El enfoque fue cuantitativo con un diseño transversal de campo, No experimental; descriptivo.

### **Resultados:**

Los resultados muestran que el 60% los inmigrantes venden informalmente en espacios públicos inseguros, sin ser estacionarios.

## **Conclusiones**

Los espacios que utilizan los emprendedores informales venezolanos requieren de soluciones significativas por parte de las instituciones públicas.

## ABSTRACT

The project describes the social spaces in which the informal entrepreneurship of Venezuelan immigrants is developed, the research design was non-experimental cross-sectional, with a descriptive scope. Migrants carry out their activities in a

nomadic way on public roads without any control. It is concluded that the spaces used by entrepreneurs require significant solutions by public institution

Keywords: Entrepreneurship, Social spaces, immigrants, labor informality

Background:

DANE (2019) and the Venezuelan Migration Observatory (2020) study the growth of the Venezuelan population in cities of the country and the sectors in which they work

**Objective:**

Describe the social spaces in which the informal entrepreneurship of Venezuelan immigrants takes place,

Materials and methods:

The approach was quantitative with a cross-sectional field design, not experimental; descriptive. The study variable was Social spaces for informal entrepreneurship.

Results:

The results show that 60% of immigrants sell informally in unsafe public spaces, without being stationary.

**Conclusions:**

The spaces used by Venezuelan informal entrepreneurs require significant solutions from public institutions
